Report on "IoT (Internet of Thing) Webinar"

The spread of COVID-19 has affected almost all spheres of human life – physical, emotional, and economic. In India, we are all navigating through the current lockdown. Like every other crisis, we will ride this tide, adapt, and come out stronger. The pandemic has significantly disrupted the higher education sector as well, which is a critical determinant of a country's economic future. Hence Computer Science and Application Department had organised a **webinar on Internet of Things on 08.12.2020 from 11 am to 12pm**. The resource person for this event was Mr. A man Singh working in Tech2secur company .55 students attend the webinar. The main aim of the webinar was to educate students about fundamental units of IOT project, sensor, Microcontroller and connectivity of IOT .He stressed on the point that everything is becoming automated, accelerated and augmented and in the near future objects will communicate more often than now.

Lastly he explained about additional IOT device capabilities like the advantages of using robots and drones in this vulnerable situation. The session was very much informative. The discussed areas were of great benefit for the students as the topic was very much relevant with the current scenario and working domain. Students were enlightened with the most widely used advance technologies in this domain. The webinar ended with Questionnaire session .Feedback for the session was also collected.
